

Preschool Art

Building a Photo Collage

Materials

- Glue or glue stick
- One piece of tag-board (to use as a base)
- Colored construction paper
- Child-safe scissors
- Photos (or pictures from old magazines)

Step by Step:

- 1) Find pictures that you would like to use for your collage. They can be from a magazine, photos of family or friends, or you can print out pictures from the Head of the Class Preschooler Web site.
- 2) Cut the pictures out and begin to arrange them on your tag board base. You can also use the colored construction paper to create a frame for your pictures.

3) When the pictures are arranged just how you want them, glue them down on your tag board base. Let your collage dry, and then hang it in a special place.
